Billings Clinic At-a-Glance

About Billings Clinic
Billings Clinic is Montana’s largest health care organization serving Montana, Wyoming and the
western Dakotas. A not-for-profit organization led by a physician CEO, Billings Clinic is governed
by a board of community members, nurses and physicians. Billings Clinic is an integrated
multi-specialty group practice with a 304-bed hospital and Level II trauma center. Billings Clinic
has about 4,200 employees, including more than 450 physicians and advanced practitioners
offering more than 50 specialties.

Billings Clinic has 13 regional partnerships, including management agreements with 12 Critical
Access Hospitals and a joint venture at Community Medical Center, Missoula, MT. In addition,
we conduct approximately 120 specialty care clinics per month at 20 different regional locations
for residents of rural Montana, Wyoming, and North Dakota. We were designated as the first
Magnet organization in Montana in 2006, and are a member of the Mayo Clinic Care Network.
Billings Clinic launched Montana’s first Internal Medicine Residency program in 2014 and in

2018 announced the creation of Montana’s first psychiatric residency program, testaments to its
mission of advancing health care, education, and research.

Last year, Billings Clinic’s Community Benefit totaled nearly $30 million, including $6.5 million
in financial assistance provided to 11,000 patients.
Welcome to Billings Clinic

Billings Clinic has more than 400 physicians and advanced practitioners as part of our approximately 4,000 clinical and support staff providing health care, education and research to our community and region. We value our relationship with you and hope this provider directory can assist you in partnering with Billings Clinic to provide the highest quality of care for the patients we serve. With patients at the core of our multi-specialty group practice, our goal is to make the referral process seamless, while emphasizing the importance of returning your patient back to you as quickly as possible.

Patient Transfer Process

The purpose of the Transfer Center is to assist you and your care team in determining what will best meet the needs of your patient. The benefit of this process is to ensure a seamless connection from providers in the region to the correct accepting provider. All of the information is obtained in one step. In addition, MedFlight dispatch will be on the line to help coordinate a flight if necessary. Our specially trained staff will coordinate your transfer or arrange for a medical conversation with a Billings Clinic physician.

To contact the Transfer Center call Billings Clinic’s Physician Communication Line: 255-8411 or 1-800-325-1774, 24 hours a day, seven days a week.

MedFlight

Billings Clinic’s MedFlight Air Ambulance Service was the first flight team west of the Mississippi River and began serving the region in 1978. Now a regional leader in patient transport, the MedFlight team strives to offer the highest level of clinical assessment and treatment during transport. The patient is our first priority. The focus of MedFlight is to deliver the highest quality care in the safest environment possible while minimizing costs to the patient.

Capabilities: MedFlight is able to bring additional equipment, medications and resources to the patient if needed. These include blood products, medications to reverse anticoagulants, antivenin for rattlesnake bites and a balloon pump to help a post cardiac injury patient. Our Billings Clinic physicians will coordinate care between the sending facility and our flight team.

Specialized teams: Billings Clinic offers specialized flight teams for high risk OB, and NICU (Neonatal ICU) patients. The flight team is composed of Registered Nurses and Registered Respiratory Therapists. MedFlight can also transport any adult or pediatric patient requiring transfer to another facility.

Safety: MedFlight is committed to the safest possible transport of patients. Our two Beechcraft King Air 200 turbojet fixed wing aircrafts have dual engines and are flown by two pilots.

Value: MedFlight remains committed to delivering the highest quality care at the lowest possible cost, thereby delivering both great care and great value. With the increasing number of Air Medical Providers in the region, we encourage you to investigate each provider agency for their capabilities, safety and value, as many providers cost substantially more.

BillingsClinicConnect

Our vision is to be a national leader in providing the best clinical quality, patient safety, service and value. Shared electronic medical records are one way we have worked toward achieving that goal. For secure electronic access to shared patients medical records we have established BillingsClinicConnect, a secure portal in which you can view records and have access to a variety of resources. To enroll in BillingsClinicConnect, please visit www.billingsclinicconnect.com or call our Physician Communication Line at 255-8411 or 1-800-325-1774.

Board Certification: Allergy and Immunology, Internal Medicine
Joined Billings Clinic: 2018

Cardiovascular Services

Physicians in the Department of Cardiology offer consultative, diagnostic, treatment and therapeutic services to adult patients with cardiovascular diseases. They work closely with members of the Department of Cardiac Surgery.

Pediatric Cardiology for children under age 18, is available through Billings Clinic's Pediatric Center (see page 49.)

Consultative services and a wide range of specialized cardiac procedures are offered, including exercise and pharmacological stress testing, echocardiography, nuclear cardiology, cardiac imaging including cardiac MRI and CT, holter monitoring, cardiac catheterization, coronary arteriography, and coronary interventional procedures. In addition, the department has three electrophysiologists. Services include diagnostic electrophysiology studies, tilt-table testing, pacemaker and defibrillator implantation and follow-up, radiofrequency ablations, and Laser lead extractions.

Billings Clinic has state-of-the-art cardiac catheterization labs where cardiologists perform cardiovascular interventions such as coronary angioplasty, intracoronary stent placement and atherectomy, structural heart; including TAVR and chronic total occlusion. The electrophysiology lab features an EP monitoring system and X-ray equipment that augments leading edge technology for complex ablation procedures, including treatment for atrial fibrillation. Wellness and prevention services include a heart failure management clinic, cardiac rehabilitation, and nutrition education and counseling with a registered dietitian.

Cardiac, Thoracic & Vascular Surgery

The Department of Cardiac, Thoracic & Vascular Surgery provides a wide array of services which include primary and reoperative coronary artery bypass, and cardiac valve surgery including valve replacement and repair, along with minimally invasive valve surgery in selected patients. Cardiac revascularization generally includes the utilization of the internal mammary artery. Some patients are candidates for minimally invasive off-pump (beating heart) bypass surgery. Operations for acute and chronic aortic dissection, as well as thoracic aeurysms, are performed by the division. Surgical treatment of atrial fibrillation is available.

Billings Clinic thoracic surgeons provide surgical evaluation and treatment for pulmonary, pleural, mediastinal and chest wall cases. Our surgeons offer expertise in Video-Assisted Thoracoscopic Surgery (VATS), robotic-assisted surgery, complex cases requiring thoracotomy and employ minimally invasive techniques when appropriate.

Billings Clinic combines the expertise of vascular surgeons, cardiothoracic surgeons and interventional radiologists to provide comprehensive vascular care for patients in our region. Vascular Surgery consists of experienced, board-certified surgeons specializing in traditional vascular medicine and surgery who provide treatment for carotid and vertebral artery blockages, peripheral arterial disease, thoracic and abdominal aeurysms, thoracic outlet syndrome, varicose veins and deep vein thrombosis. The surgeons and interventional radiologists also offer endovascular procedures for arterial and venous intervention. The Billings Clinic Vein Center is available for patients needing evaluation and treatment of vein disorders including lower extremity varicose vein disease. The Vascular Lab offers specialized diagnostic procedures such as real time Doppler images of the carotid arteries, segmental pressures and exercise testing on upper and lower extremities.

Cardiac, Thoracic & Vascular Surgery is located on the second floor of the clinic.

Diabetes, Endocrinology & Metabolism

The physicians, nurse practitioner and physician assistant in the Department of Diabetes, Endocrinology & Metabolism specialize in the diagnosis and treatment of endocrine gland diseases. These include diabetes, thyroid, parathyroid, pituitary and adrenal gland dysfunction. This team of providers also focuses on metabolic disorders such as obesity and diabetes, and works with a multidisciplinary team including certified diabetes educators, registered dietitians, certified personal trainers, and social workers.

Emergency Medicine

Emergency medical services are provided at the Nationally Designated Level II Emergency & Trauma Center located on the north side of the hospital off 10th Avenue North. Billings Clinic Emergency & Trauma Center has a full time Board Certified Emergency Physicians prepared to provide care for any acute illness or injury. Emergency services span the continuum of emergency care, including pre-hospital medical control, assessment, life-saving stabilization, and patient disposition to in-hospital care. Physicians utilize wireless tablets at the bedside to access the patient’s medical history, including medication information, allergy information, lab, radiology, test results, and physician notes. Care managers are staffed to assist the physicians in providing social services interventions and discharge planning. The Emergency & Trauma Center is committed to providing exemplary service-oriented, quality care to patients, their families and consultants.

Billings Clinic’s MedFlight Air Ambulance Service optimizes our regional service by providing safe and rapid critical care airplane transport to the Trauma Center. MedFlight’s team is comprised of critical care nurses and respiratory therapists who are trained to provide stabilization of all health care needs available at our facility. To arrange an emergency transfer via MedFlight air or ground transport to Billings Clinic Emergency & Trauma Center call toll free: 1-800-325-1774.

Facial Plastics and Reconstructive Surgery

Dr. Wolpoe specializes in facial reconstruction for both medical and cosmetic purposes. His practice includes, but is not limited to, the following: functional and cosmetic nose surgery (rhinoplasty), blepharoplasty (eye), brow lifts (foreheads), otoplasty (ears), skin cancer reconstruction, scar revision, ear piercing repair, skin resurfacing for acne, scars and damage from effects of the sun and aging. A variety of cosmetic procedures are offered for wrinkles, necks, and eyes as well as spa services such as lash extensions, facial waxing, microneedling, peels, intense pulsed light and hair reduction for faces (except around eyes), backs, chests, arms, underarms, bikini lines and legs. Many procedures can be performed in the office and more complex procedures may be performed in the Billings Clinic Surgery Center.

Family Medicine

Billings Clinic has board-certified family medicine physicians, physician assistants and nurse practitioners. To provide effective health management and education, these physicians emphasize preventive health care and screening. They provide continuing care for the entire family, including women's health services, prenatal care, newborn care, immunizations, physical examinations, urgent and chronic care.

Department Chair: Ryan P. Schwanke, MD

Our board-certified gastroenterologists provide screening, diagnosis and treatment for digestive tract diseases including nutritional disorders, biliary tract disease and hepatology. The physicians offer leading-edge technology such as capsule endoscopy, BRAVO 48 hour pH testing, high resolution anal rectal manometry, and esophageal motility testing. Outpatient diagnostic procedures are performed at Billings Clinic Hospital. Consultations, including therapeutic endoscopy and educational programs, are available.

Genetic Counseling

Genetic Counseling is a process of providing information and support to families who have members with birth defects or genetic disorders, and to families who may be at risk for a variety of inherited conditions. During genetic counseling, patients and their families learn about genetic conditions for which they are at risk and are offered support as they begin to adapt to the medical, psychological and family issues that arise with genetic disease. This may include learning about genetic testing, management, prevention, resources and research. The primary goal of genetic counseling is to promote informed choices and healthy adaptation to the risk or condition. Our Certified Genetic Counselors see patients in the ob/gyn and oncology departments.

Geriatrics

The board-certified physicians and certified non-physician providers with the Division of Geriatric Medicine bring a team approach to helping diagnose and manage health care for elderly persons. A comprehensive assessment can be completed by a multidisciplinary team that helps identify the chronic, medical and psychosocial needs of frail elderly. The staff works with elderly persons who are inpatients, outpatients or living in a nursing home. The geriatrics team also brings expertise in diagnosis and management of patients with dementia and other psychological illnesses.

Hospital Medicine

The Hospitalist Program consists of board-certified and board-eligible physicians whose goal is to provide high quality, safe, efficient inpatient care for patients while they are in the hospital, as well as medical consultation for other hospital services. Not having an office practice and remaining in the hospital all day allows the hospitalist physician to respond to the patient’s needs in a timely manner. The hospitalist physicians not only focus on patient care but maintain excellent communication between patients, nurses, care managers, families and referring physicians.

Internal Medicine

The Department of Internal Medicine offers comprehensive medical services for adults. In the Internal Medicine department, board-certified physicians, physician assistants and nurse practitioners provide primary care for adults and adolescents with a broad range of general medical problems. They also offer routine physical examinations and management of acute and chronic medical illnesses. Physicians, physician assistants and the nurse practitioners in the division have a strong interest in preventive medicine.

Department Chair: Eric J. Saberhagen, MD, FACP

In addition to the Internal Medicine physicians who see patients at the main campus, Billings Clinic employs Internal Medicine physicians at the following branches:

Billings Clinic - Downtown
Billings Clinic - West
Billings Clinic - Heights

Naturopathic Medicine

Billings Clinic offers integrative medicine for whole-person care, including but not limited to naturopathic medicine and integrative oncology. This integrative approach combines a philosophy of holistic care with state-of-the-art medical services. Services offered through the Integrative Medicine Department include well exams for men and women; menopause/peri-menopause treatment options (including bio-identical hormones); nutrition, botanical medicine, vitamin/mineral supplementation; and integrative cancer care.

Neonatology

Neonatology is a subspecialty of pediatrics focused on the medical care of ill or premature newborn infants in the Billings Clinic Family Birth Center’s Level III neonatal intensive care unit (NICU). Our neonatologists and pediatricians, along with our maternal-fetal medicine specialists, work together with NICU nurses in the care of high-risk moms and their babies. Maternal and neonatal emergency transport is available by MedFlight air ambulance to our NICU.

Nephrology

Board certified nephrologists provide diagnosis and treatment of diseases involving the kidneys, including acute and chronic renal failure, glomerulonephritis, vasculitis and complicated cases of hypertension and electrolyte disturbances. Dialysis services for patients are available in the Billings Clinic Dialysis Center, located in the hospital, as well as at our satellite dialysis site in Sheridan, Wyoming. We have established working relationships with several transplant centers, and assist patients in preparation for kidney transplantation. We also provide ongoing care for patients following kidney transplant.

Outreach clinic locations include Bozeman and Miles City, Montana, and Cody and Sheridan, Wyoming. Telemedicine appointments are also available in Baker, Big Timber, Circle, Cubalaka, Forsyth, Glasgow, Glendive, Livingston, Malta, Miles City, Plentywood, Poplar, Scobey, Shelby, and Sidney, Montana, and Cody and Lovell, Wyoming.

Neurology

The Department of Neurology specializes in disorders of the neurological system and structures such as multiple sclerosis, epilepsy and seizure, sleep disorders, stroke, muscular dystrophy and movement disorders. In collaboration with the pediatric department, we offer diagnosis and treatment to both children and adults for disease of the brain, spinal cord, peripheral nerves and muscles. Our board certified physicians also perform neurological testing in the clinic, such as electromyography(EMG) and electroencephalography(EEG).

The Neurosurgery physicians offer diagnosis, treatment and surgery for diseases and injuries to the brain, spinal cord, peripheral nerves and muscles in both adult and pediatric patients. Treatment encompasses both non-operative management (prevention, diagnosis—including image interpretation—and treatment such as, neurocritical intensive care, brain and spinal cord injury and rehabilitation) and operative management with its associated image use and interpretation. The operative treatment of brain disorders includes surgery for head trauma, the excision and biopsy of brain tumors, surgical procedures involving both the intraand extra cranial vascular supply to the brain, pituitary surgery, epilepsy surgery and surgery requiring computer-assisted stereotactic localization of brain lesions. The neurosurgical treatment of spinal disorders includes minimally invasive spinal surgery for the treatment of disc disorders as well as complex spinal reconstructive surgeries due to spinal degeneration, previous spinal surgery, trauma and scoliosis. These complex spine surgeries often utilize instrumentation to stabilize the spine as well as computer assisted stereotaxis to aide in the correct placement of the instrumentation. In addition, spinal surgery also includes the insertion of implantable pain pumps and electrical stimulation of the nervous system for the treatment of chronic pain of multiple etiologies. Gamma Knife Radiosurgery is available for certain neurologic diseases centered in the brain.

Obstetrics & Gynecology

The Department of Obstetrics and Gynecology is staffed by board-certified and board-admissible physicians and nurse practitioners. The department offers a wide range of basic and specialized services including maternal/fetal medicine, reproductive endocrinology and infertility, in-vitro fertilization, genetic counseling, microsurgical procedures, high risk obstetrics with amniocentesis and ultrasound services. Gynecologic care includes gynecologic urology and minimally invasive daVinci robotic surgery. The ob/gyn physicians are proficient in gynecologic endoscopy including colposcopy, laparoscopy, and hysteroscopy.

The Family Birth Center is based on the LDRP (labor, delivery, recovery, postpartum) model. The Family Birth Center features 21 private birth suites, in-room sleeping accommodations for the birth partner and private bathrooms. Facilities include onsite triage rooms for labor assessment, two surgical suites and a Level III Neonatal Intensive Care Unit. Board-certified ob/gyn physicians are on staff, as well as maternal-fetal medicine physicians and neonatologists.

Department Chair: Dr. Camille Osborn, MD, FACOG
Department Chair: Samuel J. Sillitti, MD, FACOG - Bozeman OB/GYN
Regional Chair: William J. Peters, MD, FACOG
Family Birth Center Medical Director: Clayton H “Tersh” McCracken, MD, FACOG

In addition to the Obstetrics and Gynecology physicians who see patients at the main campus, Billings Clinic employs ob/gyn physicians at the following branches:

Billings Clinic - West
Billings Clinic - Miles City
Bozeman OB/GYN

Dana Edwards, MD, FACOG

Occupational Medicine

Occupational Medicine is staffed with physicians who are board certified in preventive medicine/occupational medicine, experienced physician assistants, and physical therapists familiar with industrial rehab. They provide a range of occupational health services including diagnosis and treatment of occupational illnesses and injuries, comprehensive preplacement & DOT exams by a Certified Medical Examiner, onsite work safety, drug testing, health consultations, periodic exams, IME's, second opinions, FCE's and care management.

The department offers a multitude of services for businesses, employers and their employees to promote health in the workplace and to restore ill or injured employees to productive work.

Oncology/Hematology - Medical

Located in the comprehensive Cancer Center and using a team approach with surgery, interventional radiology, gynecologic oncology and radiation oncology, physicians in the Department of Oncology and Hematology offer comprehensive diagnosis and treatment of oncologic and hematologic disorders. The staff includes board-certified physicians in internal medicine, oncology and hematology.

The department is involved with staging and treatment plans for all types of cancers and participates in clinical cancer research with the National Cancer Institute, Montana Cancer Consortium, Gynecologic Oncology Group, and several pharmaceutical companies.

Oncology - Radiation

The Department of Radiation Oncology offers the most innovative technology in the region and is part of the Cancer Center’s multidisciplinary team. These physicians take part in several weekly site-specific Tumor Boards and work together with surgeons, medical oncologists and gynecologic oncologists to provide the most effective oncology treatments for our patients. They provide radiation treatments with intensity modulated radiation therapy (IMRT), stereotactic radiosurgery, including Gamma Knife procedures, image guided radiation therapy (IGRT) and high dose rate brachytherapy.

Special Interests: General Otolaryngology, Head and Neck Surgery, Otology and Skull Base Surgery, Thyroid and Parathyroid Surgery
Board Certification: Otolaryngology (Ear, Nose and Throat)
Joined Billings Clinic: 2009

Robin S. Horrell, MD, PhD
(Surgical Advisor to Information Technology)
Billings Clinic - Downtown - 801 North 29th Street
Undergraduate School: University of Colorado Boulder, Boulder, Colorado
Graduate School: California Institute of Technology, Pasadena, California
Medical School: University of Cincinnati, Cincinnati, Ohio
Internship: University of Louisville, Louisville, Kentucky
Residency: University of Louisville, Louisville, Kentucky
Special Interests: Ear and Sinus Surgery, Head and Neck Surgery, Parathyroid Surgery, Throat Diseases, Thyroid Surgery
Board Certification: Otolaryngology (Ear, Nose and Throat)
Joined Billings Clinic: 2005

Phillip S. Key, MD
Billings Clinic - Downtown - 801 North 29th Street
Undergraduate School: University of California Irvine, Irvine, California
Medical School: Harvard University, Boston, Massachusetts
Internship: University of Southern California, Los Angeles, California
Residency: University of Southern California, Los Angeles, California
Special Interests: Medical and Surgical Treatment of Nose and Sinus problems, Pediatric: Ear, Nose and Throat problems
Board Certification: Otolaryngology (Ear, Nose and Throat)
Joined Billings Clinic: 1995

Matthew E. Wolpoe, MD
Billings Clinic - West - 2675 Central Avenue
Undergraduate School: Franklin & Marshall College, Lancaster, Pennsylvania
Medical School: Mount Sinai School of Medicine, New York, New York
Internship: Johns Hopkins Hospital, Baltimore, Maryland
Residency: Johns Hopkins Hospital, Baltimore, Maryland
Advanced Training: Johns Hopkins Hospital, Baltimore, Maryland
Board Certification: Otolaryngology (Ear, Nose and Throat), Facial Plastics and Reconstructive Surgery
Joined Billings Clinic: 2011

Joseph K. Schmidt, NP
Billings Clinic - Downtown - 801 North 29th Street
Undergraduate School: University of North Dakota, Grand Forks, North Dakota
Graduate School: Montana State University, Bozeman, Montana
Joined Billings Clinic: 2017
Audiology

The providers in the Department of Audiology evaluate and manage adults and children with hearing loss and balance disorders. The audiologists assess the hearing mechanism utilizing behavioral techniques as well as electrophysiologic tests including otoacoustic emissions, tympanometry and auditory evoked potentials. Balance disorders are evaluated and treated utilizing videonystagmography and vestibular testing. The audiology staff assesses a patient's need for amplification and other aural rehabilitation, fitting hearing instruments and assistive listening devices as well as cochlear implant mapping.

Kristy L. Foss, MCSD
Billings Clinic - Downtown - 801 North 29th Street
Undergraduate School: University of Montana, Missoula, Montana
Graduate School: University of Montana, Missoula, Montana
Special Interests: Tinnitus Evaluations, Cochlear Implant Mapping, Evoked Potentials, Hearing Aids, Pediatric Audiology,

Joined Billings Clinic: 1988

Janice A. Johnson, AuD
Billings Clinic - Downtown - 801 North 29th Street
Undergraduate School: University of Minnesota, Minneapolis, Minnesota
Graduate School: University of Minnesota, Minneapolis, Minnesota
Graduate School: Arizona School of Health Sciences, Mesa, Arizona
Special Interests: Cochlear Implant Mapping, Evoked Potentials, Hearing Aids, Pediatric Evaluations, Tinnitus Evaluations, Vestibular Evaluations, Vestibular Treatments

Joined Billings Clinic: 2007

Kelsey C. Mann, AuD
Billings Clinic - Downtown - 801 North 29th Street
Undergraduate School: University of Wyoming, Laramie, Wyoming
Graduate School: University of Wisconsin, Madison, Wisconsin
Special Interests: Audiology, Cochlear Implant Mapping, Difficult to Test Populations, Evoked Potentials, Hearing Aids, Pediatric Audiology, Vestibular Evaluations, Vestibular Treatments

Joined Billings Clinic: 2012

Palliative /Supportive Care

Palliative care is provided by a team of doctors, nurses, and other specialists who work together with a patient's other doctors to provide an extra layer of support. It is appropriate at any age and at any stage in a serious illness and can be provided along with curative treatment.

Irene Lohkamp, MD
(Medical Director, Aspen Meadows, Geriatrics, Palliative Care)
Billings Clinic - Downtown - 801 North 29th Street
Undergraduate School: University of Pennsylvania, Philadelphia, Pennsylvania
Medical School: Baylor College of Medicine, Houston, Texas
Residency: Riverside Regional Medical Center, Newport News, Virginia
Fellowship: Geriatrics, Brody School of Medicine, Pitt County Memorial Hospital, Greenville, North Carolina
Board Certification: Geriatrics, Hospice and Palliative Medicine, Family Medicine

Joined Billings Clinic: 2011

Diane Jones, NP, MSN
Billings Clinic Cancer Center - 801 North 29th Street
Undergraduate School: Miles Community College, Miles City, Montana
Graduate School: Montana State University, Bozeman, Montana
Graduate School: Gonzaga University, Spokane, Washington

Joined Billings Clinic: 2016
Pathology

The Department of Pathology is staffed by board-certified pathologists who provide a full range of anatomic pathology of both surgical and sub-specialty pathology, including cytopathology, hematopathology and gastrointestinal pathology. They also provide clinical pathology services including consultations in transfusion medicine, clinical chemistry, coagulation and medical microbiology. Laboratory medical directorships and consultant services are provided to regional laboratories by Billings Clinic pathology department.

Pulmonary, Critical Care & Sleep Medicine

The Department of Pulmonary Disease, Critical Care and Sleep Disorders Medicine offers diagnosis and treatment of a variety of respiratory system related illnesses. Prognosis and specific expertise are offered in: Chronic obstructive pulmonary disease; Asthma; Cystic fibrosis; Lung cancer; Interstitial lung disease; Tuberculosis; Sleep medicine; Pulmonary Hypertension and Pleural disease; Pulmonary physiology and exercise testing. Intensive Care Department physicians are available around the clock for consultation by phone. All physicians in the department are American Board of Internal Medicine certified in pulmonary disease and critical care medicine. The department is associated with the Sleep Disorders Center which is accredited by the American Sleep Disorders Association.

Department Chair: Jamie C. Riha, MD

In addition to the Pulmonary physicians who see patients at the main campus, Billings Clinic employs a pulmonary physician at Billings Clinic - Cody.

Research

Cancer Research

The Billings Clinic Cancer Research program is involved in more than 100 clinical trials ranging from phase 1-4. Clinical trials are available to a wide variety of cancers with an emphasis on the newest therapies. Billings Clinic is a part of the newly formed National Cancer Institute (NCI) Community Research Program (NCCRP) with the Montana Cancer Consortium. The program is a combination of the Community Cancer Oncology Program (CCOP) and the NCI Community Cancer Center Program (NCCCP). Besides clinical research a new area offered is Cancer Care Delivery Research (CCDR). This new research which will look at how cancer care is being delivered. Redesign of the cooperative group program has also occurred with the formation of research bases Alliance, NRG, and Southwestern Oncology Group which we are members through the Montana Cancer Consortium. We also continue to offer pharmaceutical trials and specimen collection trials with Total Cancer Care program with Moffitt Cancer Center.

Clinical Research

Clinical Research is being done in many departments in the Billings Clinic including Diabetes and Endocrinology, Cardiology, Allergy, Gastrointestinal, Internal Medicine, Infectious Disease, and Pediatrics involving over 40 research trials. Current studies are being conducted for Asthma, Gout, Cystic Fibrosis, Diabetes, and COPD. Clinical Research trials bring new medications and technology to patients in our community. To find out the latest trials available for patients please check the Billings Clinic web.

Collaborative Science and Innovation

Established in 1999, the Center for Clinical Translational Research identifies and studies the most effective ways to organize, manage, finance and deliver high quality care; reduce medical errors; and improve patient safety and quality of care. The Center works together with urban and rural community clinics, health care professionals and health care agencies throughout the region to test new methods of providing the most efficient, effective and highest quality care possible. The Center works via Telemedicine in partnership with rural communities to conduct studies pertaining to chronic disease management. Studies are currently being conducted in Billings, as well as numerous rural communities in both hospital and clinic environments. The Center also collaborates on research studies with universities and medical clinics, as well as health care systems, across the nation.

SameDay Care and ExpressCare

SameDay Care and ExpressCare is staffed by physicians, physician assistants, and nurse practitioners who have expertise in episodic and acute medical problems. SameDay Care is open extended hours and on weekends. This walk-in service for care is available for same day visits for non-emergency, non-chronic conditions and/or complaints offered at Billings Clinic West and Heights. At the Downtown location, convenient appointments can be scheduled online, by phone, or by walking in.

Billings Clinic - Downtown - 802 North 28th Street

ExpressCare offers patients ages 2 and up, quick access to primary care for minor medical issues. ExpressCare is located in select Albertsons on Rehberg, Central and Main in the heights. Open 7 days a week.

Surgery

Cardiac Surgery

The Department of Cardiac, Thoracic & Vascular Surgery provides a wide array of services which include primary and reoperative coronary artery bypass, and cardiac valve surgery including valve replacement and repair, along with minimally invasive valve surgery in selected patients. Cardiac revascularization generally includes the utilization of the internal mammary artery. Some patients are candidates for minimally invasive off pump (beating heart) bypass surgery. Operations for acute and chronic aortic dissection, as well as thoracic aneurysms, are performed by the division. Surgical treatment of atrial fibrillation is available. Cardiac, Thoracic & Vascular Surgery is located on the second floor of the clinic.

Residency: University of Colorado Denver, Denver, Colorado
Fellowship: Thoracic and Cardiovascular Surgery, Mayo Clinic, Rochester, Minnesota
Special Interests: Aortic Disease-Dissection, Arterial Aneurysmal Disease, Atrial Fibrillation Surgery, Carotid Artery Disease, Myocardial Revascularization, Peripheral Vascular Disease, Valve Repair and Replacement, Valvular Heart Disease
Board Certification: Thoracic Surgery
Joined Billings Clinic: 1986
The General Surgery Department provides a broad range of capabilities for referral surgical procedures. The department’s board-certified physicians have special interests in laparoscopic and thoracoscopic surgery, endocrine disease, esophageal disease, biliary tract disease, gastrointestinal diseases, thoracic malignancy, pediatric surgery, and breast, colon, abdominal and rectal surgery. This department frequently receives referrals for specialized and complicated surgical cases as well as referrals for critical care, emergency and trauma. A free-standing out-patient surgery center is utilized for patients who will not require hospitalization after their procedure. Many departments utilize this state-of-the-art surgery center for their patients who will be well enough to go home that same day.

Thoracic Surgery

Billings Clinic thoracic surgeons provide surgical evaluation and treatment for pulmonary, pleural, mediastinal and chest wall cases. Our surgeons offer expertise in Video-Assisted Thoracoscopic Surgery (VATS), robotic-assisted surgery, complex cases requiring thoracotomy and employ minimally invasive techniques when appropriate.

Vascular Surgery

Billings Clinic combines the expertise of vascular surgeons, cardiothoracic surgeons and interventional radiologists to provide comprehensive vascular care for patients in our region. Vascular Surgery consists of experienced, board-certified surgeons specializing in traditional vascular medicine and surgery who provide treatment for carotid and vertebral artery blockages, peripheral arterial disease, thoracic and abdominal aortic aneurysms, thoracic outlet syndrome, varicose veins and deep vein thrombosis. The surgeons and interventional radiologists also offer endovascular procedures for arterial and venous intervention. The Billings Clinic Vein Center is available for patients needing evaluation and treatment of vein disorders including lower extremity varicose vein disease. The Vascular Lab offers specialized diagnostic procedures such as real time Doppler images of the carotid arteries, segmental pressures and exercise testing on upper and lower extremities.

Gynecologic Urology
Urogynecology

Located in the department of Obstetrics and Gynecology. Dr. Craig Mayr specializes in Female Pelvic Medicine and Reconstructive Surgery. Staffing includes one Physician's Assistant, one Registered Nurse, and one Certified Medical Assistant. The department is dedicated to treating various pelvic floor disorders including urinary incontinence and pelvic organ prolapse (also known as a dropped bladder or dropped uterus) and genital fistulas. We use a wide array of treatments ranging from physical therapy to surgical correction of the problem. We strive to find the right treatment tailored to meet each individual patient's needs.

Wound Healing and Hyperbaric Medicine

Billings Clinic outpatient Wound Healing and Hyperbaric Medicine Center provides a full spectrum of advanced therapies to enhance wound healing. Our comprehensive physician and provider teams provide advanced treatments for individuals with non-healing wounds to include use of compression therapy, negative pressure wound treatment, bioengineered skin substitutes and hyperbaric oxygen therapy among others. Treatments are customized to maximize patient healing.
