portable chargesync stand + battery charger

The **chargestand 3000c** is a combination desktop charger, stand, and portable battery in one convenient device, designed for iPhone or Micro USB devices. The **chargestand's** removable docking system provides both portrait and landscape orientations, allowing full access to your phone's applications while charging. Easy to transport, the 3000mAh built-in battery plugs into your phone to receive instant power on the go. Or keep it plugged into a charger or computer for seamless charging via the included **chargesync** flat Micro USB cable. Works with most cases. 1-Year Limited Warranty.

Key Features

- view your device in portrait or landscape orientation with removable docking mechanism
- sync your device while attached to computer via included chargesync flat Micro USB cable
- works with most cases
- bypass compatibility with Qualcomm® Quick Charge™ and Apple technology when charging via Micro USB cable
