

Billings Clinic is committed to improving the health of individuals and communities located in our region. We seek to provide quality care to individuals, regardless of their ability to pay, and we offer a Financial Assistance Program to help qualifying residents of our service area, with limited financial resources, in paying for their medical care.

You may be eligible for financial assistance.

If you can't afford your medical bills, including a balance on your bill after your insurance, we can give you an application form to apply for our financial assistance program. We can help you with the application, and your personal information will be kept confidential.

Billings Clinic's Financial Assistance Policy has clear guidelines to determine who qualifies for free or reduced charge services for medically-necessary medical care. The amount of financial assistance is different for each person or family, depending on your financial circumstances.
