## Coming in 2022: New Bozeman Campus

In the spring of 2022, Billings Clinic will open a new destination ambulatory center for the Gallatin Valley. We are taking our time to create an excellent facility, with attention to an optimal patient experience through flexibility and efficiency of design. This welcoming new campus offers features important to the recruitment and retention of the best possible physicians and health care providers.

Our new facilities are being built to the standards of Leadership in Energy and Environmental Design (LEED) with design by LEED-certified architects. The Bozeman campus will be integrated into the beautiful surrounding natural areas and community with a Healing Garden and connections to existing trails and streets for commuting.

Billings Clinic has started the first phase of developing its 58-acre campus in Bozeman located at E. Valley Center Rd. and N. 27th Ave. The first phase of the plan involves creating approximately 125,000 square feet of destination 'ambulatory care' facilities. The first two projects include an Ambulatory Care Center (ACC) and an Ambulatory Surgery Center (ASC) that will serve the needs of the fastest-growing county in the state of Montana. We will offer a campus that includes a multi-specialty physician group practice, urgent care and outpatient surgical services.

The center will also house outreach services from Billings Clinic's 80-plus specialties and access to Mayo Clinic specialists through Billings Clinic's Mayo Clinic Care Network affiliation and other partnerships.

Extensive research went into determining what services are needed for the master planning for the campus, including a feasibility study based on the projected needs and growth of the Bozeman community.

# Billings Clinic Bozeman

## A New Bozeman Campus

### Ambulatory Surgery Center (ASC)

- 4 Operating Rooms (540 SF each), a procedure room and a pain management room, with room to grow
- Mobile C-arms for imaging

### Ambulatory Care Clinic (ACC)

- Includes clinics, urgent care, imaging, lab, blood draw, pre-admission testing, infusion, pharmacy, mammography, specialty outreach clinics, rehabilitation therapies, a café, and conference center
- Clinics are designed to “flex” between units as needed, with identical setups for exam rooms and treatment rooms
- Space for 35+ physicians and 15+ advanced practitioners, with enclosed offices, work stations and care team stations throughout the clinic
- Attention to safety and security

### Advanced Technology

- Flexibility for the best patient experience has been emphasized in our planning process, from building adjustable spaces to preparing for future technology
- “Exam room of the future” that incorporates the latest in layout, design, equipment, and EMR technology/documentation
- Clinic imaging modalities include X-ray, fluoroscopy, CT, MR, ultrasound
- Adjacent Breast Center has mammography, stereotactic mammography, and DEXA bone density scans
- Virtual care opportunities

### A Healing Environment

- Preserving open, green spaces, including a **Healing Garden** between the ASC and the ACC, directly connected to the conference center, café, and waiting areas, including outdoor seating
- Taking full advantage of beautiful views of the mountain ranges and natural areas surrounding the campus, from inside and outside the facilities
- Infusion Center will offer scenic views of the Healing Garden
- Family-friendly amenities
- Connections to the existing trails and streets for active commuting
- Healthy and fun spaces for collaboration and social gathering

## Current Women’s and Children’s Services Available in Bozeman

For many years, Billings Clinic has been serving the community of Bozeman with high quality, compassionate women’s and children’s services at our two locations in the Gallatin Valley. Our established Billings Clinic Bozeman clinics continue to offer exceptional primary and specialty care to families while we build our new ambulatory destination center. Our Ob-Gyn, Reproductive Medicine and Pediatric Clinics will be relocated to a family-friendly portion of the new facility when it opens.

### Pediatrics

Our pediatricians care for primary and same-day medical needs at a convenient location with hours to meet the needs of busy parents. Pediatric specialty outreach in Bozeman includes cardiology, endocrinology, urology, pulmonary and cystic fibrosis.

### Obstetrics and Gynecology

Our team offers the most comprehensive women’s services in the Bozeman area. Specialty outreach in Bozeman includes maternal-fetal medicine, urogynecology and gynecologic oncology.

### Reproductive Medicine and Fertility Care

Working together, our board-certified physicians, embryologists, nursing teams and other health care professionals provide personalized fertility care in a compassionate, caring environment. Billings Clinic offers the only In-Vitro Fertilization Program in Montana or Wyoming.

### Virtual Care

All of our Bozeman practices offer Virtual Care Visits from the comfort and safety of home, for minor medical issues, primary care visits and some specialty care.
